We Are New Electronic Adventurers: Young Entrepreneurs, Owning Homefx.

HomeFx is offering high-precision electronic gadgets at affordable price; the best global brands with proven efficacy within everybody's budget. Our enterprise is alive to the emerging needs of fast-changing India; we hope to provide the necessary gadgets to deliver "COMPLETE AUTOMATED HOME"

Simplify your life... take control of your home

What Is Home Automation?

Control your home using your smartphone... from anywhere

Today's technology makes it simpler and more affordable for homeowners to purchase and install their own home control systems, and home automation has finally become a mainstream reality for the average consumer wanting to live in a "smart home". The numerous benefits of today's home automation solutions include: safety and security, energy savings, money savings, convenience and control. It can also improve the daily life of the senior citizens and the disabled by offering voice control and safety items.

What Home automation can do?

Control your entire music library or favorite music 

Fully integrated home theatres and media rooms 

Turning lights off when the room is bright and on, when dark, or dimming 

Opening and closing curtains or blinds remotely 

Motorized windows and garage doors that open and close at the flick of a switch 

Timers that can switch appliances on and off automatically 

Start the movie, dim the lights and set the temperature with the touch of one button 

Taps that turn themselves on remotely and then off before they overflow a sink or bath 

Fingerprint recognition door locks and gas leak sensor warns you 

Robotic vacuum cleaners and robots sprinkling water for your plants 

Automation Makes Life Easier

Make Your Home a Smart Home

Give Your Home a Brain

Think of a HomeFx controller as the brain of your automated home. It controls and monitors various systems to maximize safety, comfort, convenience, and energy savings. Automate your home to react based on your schedule or any event.

New or Retrofit

HomeFx's smart systems may be installed in new construction or retrofitted into your existing home. Simply choose automation features based upon your individual needs and budget. With many products operating wirelessly, installation can be seamless.

Easy to Use

HomeFx systems are simple to understand and operate, which is why they are Automation Simplified®. Control your entire home or vacation home from anywhere in the world with zero fees.
